SUMMARY

Full-Stack AI Engineer with 5+ years of experience building scalable enterprise systems, cloud-native applications, and AI/ML solutions. Skilled in **backend engineering, API architecture, and cloud platforms (AWS, Azure, GCP)** with a strong focus on **AI-driven analytics, LLM research, and production-ready deployments**. Published research at **IEEE CAI 2025** on GraphCodeBERT for code vulnerability detection. Recently completed an **M.S. in Computer Science (AI/ML)** from the University at Buffalo. Eager to drive innovation in **AI, full-stack engineering, and intelligent platforms** that solve real-world problems.

EDUCATION

University at Buffalo, New York

Master of Science in Computer Science – Artificial Intelligence

Aug. 2023 – Dec. 2024

CGPA: 3.8/4

Institute of Aeronautical Engineering affiliated to **JNTUH, India**

Bachelor of Technology in Computer Science and Engineering

Aug. 2016 – Sep. 2020

CGPA: 8.68/10

PUBLICATIONS

- Research paper "**GraphCodeBERT-Augmented Graph Attention Networks for Code Vulnerability Detection**" published at IEEE CAI 2025, advancing AI-driven vulnerability detection.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, TypeScript, C++.
- Frontend Development:** Next.js, React.js, HTML, CSS, Bootstrap, XML, JSON.
- Backend Technologies:** Spring Boot, REST APIs, gRPC, Kafka, Microservices, PostgreSQL, SQL, Snowflake, NoSQL.
- Cloud Platforms:** AWS, Microsoft Azure, Google Cloud Platform (GCP).
- AI/ML:** TensorFlow, PyTorch, Scikit-learn, OpenCV, NLP, LLMs, Deep Learning.
- Security & Networking:** OAuth, VPN, Load Balancer, Linux, Firewalls.
- CI/CD & Monitoring:** Kubernetes, Jenkins, Docker, Git, ELK Stack, Splunk, Datadog.
- Testing & Tools:** Selenium, Test-Driven Development (TDD), Maven, JUnit, Swagger.

EXPERIENCE

Full Stack AI Engineer | xFact, Inc, Boston MA

Jul 2025 – Sep 2025

- Built and launched an **AI-powered analytics platform**, enabling real-time data exploration and decision-making.
- Delivered **full-stack features 30% faster** by independently implementing scalable solutions with React/Next.js, FastAPI.
- Increased deployment **reliability by 40%** through CI/CD automation, Dockerized workflows, and enterprise security controls.

Software Developer (Intern), The Integrity Company, California

May 2024 – July 2025

- Enhanced Salesforce CRM efficiency through **RESTful API** integration and customer portal development with React
- Built automated testing suite achieving comprehensive code coverage using **Jest** and **Mocha**
- Implementing AI-powered analytics features using **Django** and optimizing frontend responsiveness with **Next.js**

Research Assistant (AI Innovation lab), University at Buffalo, New York

Feb. 2024 – Dec. 2024

- Developed a fine-tuned LLM for analyzing **vulnerabilities** in enterprise repositories, improving detection accuracy by **30%**.
- Built and optimized **Code Property Graphs (CPGs)** for over 1 million C/C++ functions using Joern and GraphCodeBERT.

Senior Lead Engineer / Software Engineer, NTT Data (Apisero Inc), India

Aug. 2020 – Aug. 2023

- Designed and deployed **scalable microservices** architecture using **Java** and **Python**, reducing latency by **20%**.
- Developed a **MuleSoft-Datadog metrics connector**, improving system monitoring and performance saving **\$300K annually**.
- Enhanced ETL pipelines with **Apache Spark** and Airflow, and assisted in **Snowflake**-based analytics workflows, improving large-scale data processing and reporting accuracy.
- Migrated **30% of legacy APIs** to microservices, enhancing scalability and optimization using Salesforce-AWS integrations.
- Automated CI/CD pipelines using **Jenkins** and **Kubernetes**, to check best practices and reduce deployment times by **40%**.
- Optimized Salesforce-MSSQL synchronization processes, increasing efficiency by **90%** and cutting costs by \$100K annually.

Junior Software Engineer Intern, EPAM Systems, India

Jan.2020 – June. 2020

- Designed and maintained **ETL workflows** using Hadoop and Apache Spark, improving batch processing performance by 15%.

PROJECTS

Deep Fake Detection System

- Developed a **full-stack application** leveraging **PyTorch** and **ResNet** to detect AI-generated images, ensuring high accuracy.

IntelliFit Exercise Detection System

- Built a fitness tracking platform utilizing **OpenCV** and **TensorFlow** for real-time exercise detection, deployed using **Docker**.

NLP-Based Job Resume Analyzer

- Engineered an AI resume analysis tool employing **NLP** techniques, integrated into **CI/CD** pipelines for efficient deployment.

ACHIEVEMENTS AND CERTIFICATIONS

- Salesforce Certified** (MCIA, Developer, MCPA) – Expertise in **microservices, Infrastructure and integration solutions**.
- Ranked among the **Top 100 Participants** in the Virtusa National Hackathon for developing scalable algorithms.
